Front of kit car

Side of kit car

Present students with a graphic showing 3 views of the Greenpower Challenge kit car. Ask students to identify the key features; draw out that this includes the number of wheels, the distance between front and rear wheels, the distance between the wheels on the same axle, the size of the wheels, the position of the driver in relation to the roll-bar, etc. and have the students review the Greenpower Challenge Rules & Regulations and identify the rules related to the chassis and the car body.
